“As an IT administrator leading a team of web developers, I needed seamless access to shared GitHub accounts without compromising security. Seedkeeper Pro and Passkey tokens solved both.”
R. Madrane - 49 yrs old, Morocco
Shared Access
Without Shared Passwords
Secure team authentication without exposing sensitive credentials.
SEEDKEEPER PRO
Access and password manager

Built for Trusted Security

Secure hardware architecture designed for passwordless authentication, credential protection and self-custody.

Secure Access Everywhere

Work securely from the office, home or on the go — across mobile and desktop.

"Working remotely no longer means compromising security. With Seedkeeper Pro, I get the same trusted access everywhere."

D. Nguyen - 32 yrs old, Spain

SEEDKEEPER PRO

Access and password manager

Why Seedkeeper PRO vs Traditional Security Keys

More than authentication,
a complete hardware security ecosystem.

VS

Yubikey

- Authentication only
- Single-purpose hardware
- Limited ecosystem integration

Seedkeeper PRO ecosystem

- ✓ Authentication & credential protection
- ✓ Multi-device security ecosystem
- ✓ Open-source & self-custody by design

Protect Your Digital Legacy

Securely pass down sensitive credentials and digital assets to trusted family members.

"Seedkeeper Pro is part of my digital inheritance plan. It keeps all my sensitive credentials secure in a durable device my family can access when needed."

R. Downey - 77 yrs old, USA
